

High Impact Web Conferencing and Webinars

OmniPresent platform sets new standards in quality, ease-of-use, reliability, scalability and customizability. With OmniPresent's next generation web conferencing system, you can reliably deliver rich-content presentations in a secure and versatile environment. Below are OmniPresent's top five major advantages.

No Software to Install

Unlike other well-known names, OmniPresent web conference requires no software to install. Your attendees can join meetings simply by clicking a URL, with no annoying wait times.

Communicate More Effectively

Present your ad hoc or scheduled webinars with the intuitive room features such as movie and YouTube player, whiteboard, shared documents, iBridge, world map, SMS messaging, multi-presenter and multiple simultaneous videos.

Highest Reliability

OmniPresent's redundant and load-balanced architecture ensures highest level of reliability, availability and scalability. Our Honeycomb Technology allows you to host web conferences with capacity up to 5,000 participants.

Customizable Interface & System Integrations

You can customize your online meeting rooms, registration and log-in pages to preserve your company's look and feel. Rich APIs providing database, billing, CRM and website integration.

Unique Interactive Recording

OmniPresent's unique recording technology creates interactive replay sessions exactly the way the event happened live. During a replay session, viewers can interact in the chat box, answer polls, retrieve file attachments and basically do anything that an attendee could do in a live session.
